

1. Why is the water cycle important?
  - a. Because I like to dance in the rain
  - b. It is how water reaches all living things that need it**
  - c. Without it we would have no clouds
  - d. Without it we wouldn't be able to have snow
  
2. What habitat types can the European eel be found in?
  - a. Freshwater
  - b. Saltwater
  - c. Wetlands
  - d. All of the above**
  
3. What does water become when it evaporates?
  - a. Carbon dioxide
  - b. Oxygen
  - c. Water vapour**
  - d. Methane
  
4. What stage comes after glass eel in the European eel lifecycle?
  - a. Elver**
  - b. Silver eel
  - c. Larval stage
  - d. Eggs
  
5. What process forms clouds?
  - a. Evaporation
  - b. Condensation**
  - c. Precipitation
  - d. Collection
  
6. What can be done to help eels get round obstructions in the river?
  - a. Building a new river
  - b. Building eel tunnels
  - c. Providing signs with directions for the eels
  - d. Building eel passes**
  
7. What process follows condensation in the water cycle?
  - a. Evaporation
  - b. Transpiration
  - c. Precipitation**
  - d. Collection
  
8. How long can an eel grow to be?
  - a. 1 m**
  - b. 3 m
  - c. 50 cm
  - d. 10 mm
  
9. What is the process of water soaking into the soil called?
  - a. Transpiration
  - b. Infiltration**
  - c. Condensation
  - d. Sponge
  
10. Where do European eels spawn?
  - a. Freshwater rivers
  - b. Arctic sea
  - c. Sargasso Sea**
  - d. Ponds and lakes
