

Crossword

Read the clues for the words going across and down to fill in the crossword. Go back to the home learning resources to remind yourself if you get stuck.

Across

5. The junction between two rivers, where a tributary meets a river
6. The process of water vapour cooling and forming clouds
7. A living thing that eats other plants and animals
8. The end of a river, where it flows into a lake, sea or ocean
9. Very small pieces of plastic, less than 5mm long
10. Food chains show the transfer of this between organisms

Down

1. Trees remove carbon dioxide from the atmosphere and release oxygen in this process
2. The process of water droplets falling from clouds as rain, snow, sleet or hail
3. A species that has been brought into an area, either by accident or on purpose, where it is not normally found
4. A bend in a river that slows down the rate of water flowing, reducing flood risk
