

Stained paper window fish

To make your fish...

- 1) Measure and mark half way along each of the short edges of a piece of card then join these two points with a line. Score down the long centre line that you have drawn with safety scissors and a ruler. Fold along the scored line.
- 2) Place your template on the folded card. Make sure that the edges labelled 'FOLD' are placed against the fold of your card. Draw around each edge of the template, including the inside edge.
- 3) Keeping the card folded, cut along the lines then unfold to reveal your fish outline.
- 4) Take a piece of plain white tissue paper. Using a glue stick, stick strips of coloured tissue paper to it lengthways. Decorate this with crayons if you like. Be careful not to press on too hard as the paper is delicate.
- 5) Stick your outline to your tissue paper using a glue stick. Cut away the tissue paper around the outside of your fish outline.

An adult may need to help you with the scissors.
